

Thinkersize's Cranium CoRE Arrives to Create a Generation of STAR's (Superior Thinkers Attained by Reading)

What do reading; writing, speaking and listening all have in common? They are all about thinking and you improve by practicing them. Cranium CoRE's Educational Gaming format will draw students, from 3rd grade through high school, into practicing them with the same level of engagement as a video game. Instead of technology like TV, videos and computer games pulling young people away from activities like reading, Cranium CoRE pulls them into it. The anecdotal evidence for this is apparent.

Lake in the Hills, IL ([PRWEB](#)) June 22, 2009 -- Cranium CoRE embraces the power of the community to enhance the content of this website daily using techniques found on many popular Web 2.0 websites. The content is growing at a tremendous pace. Cranium CoRE empowers its members to self-moderate the content development and collaborate with others who are passionate about reading and critical thinking.

Imagine a fun, high-tech environment that develops language arts skills and is so compelling it engages even the least engaged students. That, at its heart, is Cranium CoRE, a community of reading engagement. "Cranium CoRE is fun and engages all students in critical thinking by using a variety of questioning strategies. Every curriculum leader needs to see it in action. Cranium CoRE has great potential as a Tier 1 [Response to Intervention \(RtI\)](#) tool to make a significant difference in student learning." Dr. Elaine Buch, Media Director, Addison Trails High School, Addison, Illinois.

This recipe of educationally sound, research based methods for literacy, woven into a high-tech, fun and thoroughly engaging website are difficult to deny. "Cranium CoRE is an incredibly effective method to boost [academic and social success in the classroom](#) while fostering a cohesive, enthusiastic atmosphere. It is always exhilarating to observe my students actively engaged in the literature, work as a team, and have fun while learning. As a teacher, my greatest joy is to see the light of achievement in a child's eyes. Cranium CoRE makes my child's eyes shine!" Mrs. Julie Mooney, English Department, Palm Beach Gardens High School, Palm Beach Gardens, Florida.

There is always an interest in anything that can improve comprehension test scores. How can Cranium CoRE help in this regard? "Cranium CoRE absolutely helps develop the skill set needed to [improve comprehension test scores](#)." Justin Gilken, English teacher, 4th most urban high school in his school district.

The most important benefit of experiencing the Cranium CoRE methodology on a continual basis is it's preparation for life. The language arts skill sets practiced within Cranium CoRE empower students to be [life long learners](#) regardless of the curriculum or job they pursue.

So, there you have it. Research based methods and strategies that work exceptionally well for reading, writing, listening and speaking skill development. Huge engagement factors in a collaborative, Web 2.0 environment.

Cranium CoRE! A phenomenon is about to happen.
